IDT is an independently approved company certified to
ISO9001:2015 requirements

Who we are

Cé muid

— IDT is a **precision engineering manufacturer** located in An Spidéal, a small village in the west of Ireland. We produce high quality components and finished sheet metal products including cabinets, enclosures, rack units, smaller components and more. We service many sectors, including telecommunications, electronics and security equipment. We retain several long-term contracts in Ireland, the UK and worldwide, a testament to our consistently high standards of professionalism and quality.

Services

Seirbhísí

— At IDT we offer turnkey solutions **from design to logistics**, allowing you to out-source your manufacturing and associated assembly operations into our experienced and skilled hands. Our wide range of capabilities coupled with our experience and values make us very confident we can find the right solution for your product or concept. We provide a complete service from initial concept stage to volume manufacturing with Kan Ban, JIT and ship to line services available. We work with a wide variety of materials, including but not limited to: Sheet Metals: HR, CR, **Stainless Steel, Aluminium, Zintec**. Covering a range of thicknesses from 0.8mm to 6.0mm in steels and from **0.9mm to 3.0mm in Stainless Steel**.

Capabilities

Cumais

— We possess the knowledge and capability to transform your metal enclosure concept into a functional product. Our high-quality precision sheet metal items are utilised in multiple demanding applications. With modern equipment and an expertly trained, adaptable team, we are perfectly situated to assist your project needs and facilitate the growth of your business. We offer **prototype and manufacturing support**, accompanied by **exceptional customer service**, superior product quality, and **punctual delivery**.

- CAD and 3D Solid modelling
- Computer-aided manufacturing
- CNC punching and laser cutting
- CNC press brake forming
- Power press forming
- TIG and MIG welding
- Resistance spot welding
- Fastener insertion
- Metal Deburring
- Material traceability
- Auto Power Painting with Iron-Phosphate pretreatment.
- Subcontract anodize/ Zinc galvanise processes
- Wet painting
- Silk screen and pad painting
- Mechanical Assembly
- Integrated Manufacture Resource Planning (MRP)
